(Hunter's Point/Bayview)

A child's ideal journey to Optimal Oral Health

Cavities are preventable!

This is an *“ideal”* journey to *“optimal”* Oral Health. You may not have followed every milestone or benchmark, but don't despair, seek more dental care!

The more dental care and oral health treatment you seek the healthier your mouth and teeth will be regardless of any missed steps!

What guides us!

Our Vision: Every Child in San Francisco is cavity-free!

Equity - We promote equity in oral health and oral health care among all San Francisco children as well as equity for our cause among other health conditions.

Well-being - We believe in the total health of the child, and integral to that is oral health!

Inclusive and Community Oriented - We work in partnership with communities to share oral health best practices and empower community members to address their oral health needs with our network!
